Diploma in Python Programming - Revised

This course begins by introducing you to the Concept of Programming and what people can do and have done with programming. You will learn all about Python and why Python is a good programming language to start with. You will learn how to use Visual Studio to create a new Python project, display text on the screen, get the user to input data, store numeric variables in your code, and work with dates and time.

Modules Studied

Module 1: Introduction to Python Programming

Module 2: Displaying Text

Module 3: String Variables

Module 4: Storing Numbers

Module 5: Working with Dates and Time

Module 6: Diploma in Python Programming - First Assessment
