Certificate Details

Diploma in Special Needs

[Score: 89]

Course Details

This free online course will improve your understanding of children with special needs and make it easier to care for them. We will introduce you to different developmental disorders and how they could affect children living with them. We'll introduce you to various visual aids like social stories and visual schedules used in managing special needs children. We will provide helpful tips and guidelines for creating and using these aids. You will learn to manage meltdown situations, and we'll show you teaching techniques for basic skills like self-feeding and using the toilet.

We will also explore Applied Behavior Analysis – the recognized standard for treating Autism. You will learn its rules, techniques, and applications to improve language, motor, cognitive and visuospatial skills. We will conclude the course by exploring the concept of school shadow support, which involves providing personalized care for a child with special needs in school settings. This part of the course also covers inclusive education and techniques and tools like functional awareness, visual and peer support.
